The RESPONSE Project - Main Goal: To develop and test fit-for-purpose, multidimensional training tools, curricula, and best-practice guidance for marine pollution preparedness and response in the Black Sea region. Continuous participatory processes involving relevant stakeholders were applied throughout the different phases of the project, from needs identification and co-development to testing and validation.

The RESPONSE Digital Toolkit: Created through the processes, activities, and experience gained throughout the RESPONSE project, the RESPONSE Digital Toolkit aims to enhance capacity for training in marine pollution preparedness and response. It brings together the knowledge and materials developed throughout the project in a user-friendly, open-access platform, offering theoretical and practical resources covering different types of marine pollution.

Key Toolkit's features & facts

Core Curricula

- Complete, ready-to-use curricula
- Covering different types of pollution
- Tailored to specific target audiences
- Combining theoretical & practical materials
- Open-access & editable resources
- Regularly updated materials

Builder Tool

- Create custom curricula tailored to user's needs
- Simple 3-step process to define:
 - Target group(s)
 - Pollution type(s)
 - Specific thematic area(s)

Toolkit Facts

- 10+ ready-to-use curricula (new materials added regularly)
- 100+ individual courses
- 400+ users including 60+ registered users
- 5Gb+ of training materials

Courses

- Individual courses
- Open-access & editable materials

User's corner

- Personalized user profile
- Easy access to enrolled & custom curricula
